ABOUT ME

I am a creative and detail-oriented front-end developer with a focus on designing and developing visually appealing and user-friendly websites. I strive to bring designs to life and provide a seamless user experience. I work on optimizing the code to make it work efficiently.

PROJECTS

1. Content Management System

Live | [Github](#)

HTML, CSS, Bootstrap5, Nodejs, EJS, Express, Mongoose, MongoDB, Git

- Developed a Blog website where you can compose your own blogs or can also use it as a daily journal.

2. Apparel Shopping Website

Live | [Github](#)

Ejs, Express, SQL, NodeJS, Bootstrap

- Developed a Shopping Website which enables users to shop new products.
- It has an admin dashboard as well as a user dashboard and it enables authentication for both.

3. Keeper App

Live | [Github](#)

ReactJs, JSX, CSS

- Designed and developed a web-based platform which is a replica of Google's Keeper App.
- It is designed with ReactJs and its properties and libraries.
